

Indoor Current Transformer, Wound Primary Model JKM-5C 15kV, 110kV BIL, 5-800A

REGULATORY AGENCY APPROVALS

E145172

LR89403

Manufactured to meet the requirements of ANSI/IEEE C57.13.

APPLICATION

Designed for indoor service; Suitable for operating meters, instruments and control devices.

WEIGHT

(Approximate)53 lbs

REFERENCE DRAWINGS

Outline0162C34108

INSULATION LEVEL

15.5kV; BIL 110kV full wave

FREQUENCY

50-60 Hz

JKM-5C DATA TABLE

The core and coil assembly is encapsulated in vacuum cast polyurethane resin. This tough material has excellent electrical and mechanical properties over a wide temperature range, has low water absorption and is resistant to oil and a variety of chemicals.

The core is made from high quality grain oriented silicon steel, annealed under rigidly controlled factory conditions. The primary winding consists of two coils in series, one around each leg of the core. This construction minimizes flux leakage thus improving the accuracy of the transformer. The secondary winding consists of two coils in parallel. Each coil is located inside the corresponding primary coil and surrounds one leg of the core.

Secondary terminals are tin plated brass, compression type with a 0.275" diameter cross-hole for wiring and a 1/4-28 clamp screw. A shorting device is provided and interlocked to the terminal cover. The terminal cover is made of a clear plastic. Provision is made for sealing the cover.

The primary terminals are tin plated copper bars molded into the cast resin insulation. They have one hole and one slot at each end, suitable for 1/2" bolts.

The primary and secondary polarity markers H1, X1, are molded in the insulation. They are thus permanent and integral parts of the transformer and cannot be readily obliterated. They are also marked white.

The nameplate is laser engraved aluminum.

The base plate is made of stainless steel; it is provided with four slots for mounting. The transformer may be mounted in any orientation.

These transformers require no maintenance, other than occasional cleaning, if installed where air contamination is severe.
